Alien looking?

Many times animals that are strange-looking, such as many of the creatures that live deep in the oceans, are often described as "alien looking" meaning they look like they came from outer space. Do these creatures really look like aliens from space? How do they resemble aliens and what do space aliens look like anyway? The ideas of space alien appearance come mainly from the images we see of them in fictional TV shows and movies.

These images are produced by artists' imaginations and ideas taken from creatures that live on earth. So if you think about it, even the strangest looking creatures on earth look like nothing more than earth creatures. There's nothing alien about them! Our Creator God has a wonderful and infinite imagination, and He created without using the ideas of someone else!
